### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.corrwireless.com/HacInfo.aspx>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Corr Wireless' compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company's web site, and its retail salespeople are trained to assist with compliant digital wireless phones. Written materials and promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. In-store signage in the retail stores informs customer of the availability of a variety of hearing aid compatible handsets. Customers who use hearing aids are urged to try out a handset before purchasing. Such customers are given a 30-day trial period within which to determine whether the digital wireless phones will work properly with their hearing aids. Further, in-store advertising for compliant handsets states: This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

### Methodology for Functionality Levels

High Tier – Highest cost handsets. Very high range of features including megapixel cameras, music player capabilities, and some with qwerty keyboards and WI-FI

Mid Tier – Mid priced handsets with mid range features. All include camera.

Low Tier – Low cost and basic feature set. Candy bar or basic flip design. It may include basic VGA camera. No music capabilities.
